

Target Gift Cards. Have you used your electronic Target Gift card yet? ETA electronically sent \$10 Target gift cards to your work email for Teacher Appreciation Week this past May. ETA is able to track two things via Target — who received the gift card email and who opened the email. Don't worry, ETA cannot track who used the gift card, what you used your gift card to purchase, or anything like that.

#Privacy

We noticed that several of you have not opened your Target email yet. Just in case you can no longer find that email, ETA is going to resend all emails that have not been opened. We will start sending out these today.
